

La Paz Miniaturas

THE FASTEST GROWING 100% TOBACCO CIGARILLO

In these hectic times it sometimes seems there's no room left for enjoyment. But just a moment! La Paz presents the rise of Miniaturas: the world's fastest growing 100% tobacco cigarillo. A full quality product specially for those brief opportunities for smoking enjoyment.

La Paz has developed Miniaturas for the cigar aficionado who wants a real cigar for those in-between moments. Up to now the offer in short-smoke 100% tobacco cigars have been rather limited, both where time and smokables are concerned. Today, Miniaturas has tastefully filled up that gap.

Just a few minutes

La Paz Miniaturas is the world's smallest 100% tobacco cigar. But no shortcuts have been taken when it comes to quality. Miniaturas have lost nothing of the Wilde La Paz character, the rich aroma, the full and rounded taste. This is clear from the moment of lighting, when the characteristic uncut end brings out all the aroma. Then it's around five minutes of ultimate pleasure.

About La Paz

La Paz is number one in the world when it comes to 100% tobacco cigars. Its Wilde products are mostly responsible for their fame. Natural, rather rough cigars with the characteristic "wild" end. The inner part, the bunch, is composed of Cuban and Brazilian tobaccos with just a touch of Javan. The outer leaf and the cover come from the tobacco region of Besuki in East Java. You can find more information on La Paz cigars on www.world-of-lapaz.com.
